Environmental and Carbon Reduction Statement

Date: 1 October 2026

About us

The Teachers' Hub Limited is a small, independent supply staff recruitment agency run by two people. We have no company vehicles, no manufacturing and no large premises, so our environmental impact is small. It comes mainly from everyday office energy use and travel to schools.

Our commitment

We support the UK's target of Net Zero emissions by 2050 and are committed to keeping our own emissions as low as we reasonably can.

What we will do

- Run the business digitally wherever possible, including timesheets, invoicing and candidate paperwork.
- Use phone and video calls where a journey is not needed, and combine school visits into single trips.
- Keep energy use, printing and waste to a minimum, and recycle where we can.
- Choose energy-efficient options when we replace equipment.

Review

We will review this statement once a year. If our size or contracts grow to the point where a full Carbon Reduction Plan under PPN 006 is required, we will measure our emissions and publish one.
